Subject: Statistical Programming update - Oncology and Pharma & Sandoz
Attachments: GDO SP Operational OrgChart (Final 17Feb17).pdf

Dear All,

Following the integration of Statistical Programming in 2016, we would like to take an opportunity to share an update on the progress of the **Statistical Programming – Oncology and Pharma & Sandoz** groups.

Within the Oncology and Pharma & Sandoz aligned SP groups, all Unit Heads (UHs) and Franchise Heads (FHs) continue in their roles and joined us already as part of the 'Extended SP LT'. There are new assignments as follows:

- **Michael Ball**, Franchise Head Neuro-Science, joins from Oncology where he had a Group/Unit Head position for 6 years, most recently overseeing several projects (incl. Jakavi, Tasigna, LEE011) and then leading the Standards group in Oncology which is now fully integrated into TSP.
- **Syamala Schoemperlen**, Franchise Head Ophthalmology, is overseeing the Alcon portfolio, including vision care and devices, and also the Retina portfolio from Pharma. Syamala joined us from Alcon where she was responsible for the entire portfolio from 2014.
- **Joseph Rowley** is assigned a.i. Unit Head Oncology (Exjade, SEG101). Joseph joined SP in Pharma in 2004 and has held roles of increasing responsibilities incl. PP for Gilenya and then Cluster Lead in Immunology & Dermatology responsible for multiple projects incl. Cosentyx.

In addition, operational manager reporting structures have been reviewed for the entire SP group and our HR systems will be updated to ensure that the HRCore OrgChart will reflect the structure moving forward. In the interim, the organizational chart is attached.

If not already done, your manager will discuss any specific changes with you in more detail.

Please join us in wishing Mike, Syamala and Joseph success in their new assignments.

Regards

Insa and Olivier
