Subject: Oncology SP Standard Announcement

Dear Colleagues,

We would like to inform you that **Vinay Mahajan** has decided to transition from Novartis Oncology to Novartis Gen Meds to pursue an opportunity within COAR Analytics effective December 1st.

Vinay will be taking on new responsibilities as a Senior Group Head in the Cardio-Metabolism Statistical Reporting Franchise and will also support the Reporting Data Standards and Reporting Systems and Tools teams in Hyderabad. He will operationally and functionally report to Sangeeta Bhattacharya, CM SR Franchise Head. Vinay will continue to work with his Oncology team as he transitions to his new role until the end of the year.

Vinay Mahajan started his career at Novartis Pharmaceutical Private Limited from July 2001 as a statistical programmer. Over the years he has taken on increased responsibilities in a number of different roles not just in Statistical programming, but also managing other groups such as LSH and Data Review programming. For the last 2 years, Vinay has been leading the RECIST and TFL implementation in the Standards group. Vinay has a master's degree in statistics from Mumbai University and has an executive MBA from Welinkar's Institute, Mumbai. Vinay has a lot of interest in Indian traditional medicinal clinical trials.

We would like to thank Vinay for the valuable contributions to Oncology and wish him all the best for his professional and personal future in COAR Analytics. We would also like to thank the leadership of both Gen Meds and Oncology for making this transition so seamless, and encouraging our associates to further develop their career within Novartis.

Thanks, and best regards,

Yvane Boudraa

Oncology Statistical Programming Unit Manager – Standard Programming

Sangeetha Bhattacharya

Global Franchise Head Statistical Reporting, CM
