Subject: FW: CD&A Organizational Announcement from BIOS&PMX and Strategy & Operations

Dear all,

I am forwarding this announcement with mixed feelings. After 7.5 years, I will be leaving Hyderabad, and will really miss all of you.

Shall connect with each of you in the next few days.

Best wishes,
Sumedha

Subject: CD&A Organizational Announcement from BIOS&PMX and Strategy & Operations

Dear Colleagues,

We would like to provide an update on important appointments and changes within the GDD Biostatistics & Pharmacometrics (B&P) Leadership team, as part of our

commitment to share information on the ongoing integration of our two highly successful organizations. These changes and appointments are the result of a rigorous talent assessment and selection process. The following appointment involves the newly created B&P Strategy & Operations team that would support all Strategy & Operations related activities while being part of the CD&A Strategy & Operations team led by Stephen Cho.

Effective April 1, 2017, **Karine Baudou** was appointed *Director of Strategy and Operations for Biostatistics and Pharmacometrics*. Karine will report to Eric Gibson (Program Manager) and Stephen Cho (Functional Manager), and will be based in Basel. Most recently, Karine was Director of Operations in the Business & Scientific Operations team within COAR-Analytics, where she was primarily responsible for Operations in Pharmacometrics. Prior to that, Karine was a Global Project Manager within IIS/IQS, responsible for projects such as Lucentis and Gilenya.

Effective July 10, 2017, **Sumedha Jayawardene** is appointed *Head of Strategy and Operations for Biostatistics and Pharmacometrics*. Sumedha will report to Eric Gibson (Program Manager) and Stephen Cho (Functional Manager), and will be based in East Hanover. Sumedha is currently India Site Head for GDO Statistical Programming, and prior to that, was India-Head for COAR Analytics & Clinical Submissions (formerly IIS, IQS). Sumedha joined Novartis at the Summit, New Jersey site in January 1998, and worked in multiple disease areas as a Biostatistician. He moved to Hyderabad in 2009, after an initial stint in Mumbai on International Assignment.

Please join us in congratulating Karine and Sumedha, and wishing them success in these new roles.

With best regards,
Eric Gibson and Stephen Cho
